

Title: General Supervisor, CLIA Laboratory
Location: Research Triangle Park, NC
Duration: Permanent, Full-time
Salary: Commensurate with experience

Sapere Bio is a longevity technology company in Research Triangle Park, NC. Our product, SapereX, allows physicians to monitor early aging and the impact of health interventions on aging trajectory. We are changing the way aging is measured and imagined for longer healthspan and better lives.

To be successful in this role, you need a combination of skills including:

- Excellent hands-on technical skills in the laboratory, preferably including qPCR
- Judgement and flexibility to thrive in a start-up environment
- Direct, professional, clear communication style
- MacGyver attitude – ready to engineer solutions to unanticipated problems, whether working with the team internally or with medical assistants on the customer side
- Comfort with change and ability to think on your feet
- Leadership with accountability

Responsibilities

In the first 2 months, you will be responsible for setting up our CLIA laboratory for high-complexity molecular testing - with assistance from our off-site Laboratory Director. In the following 6-8 months, you will be responsible for daily CLIA lab operations and hands-on testing. As testing volume grows, you will be responsible for training and supervising new testing personnel. As General Supervisor, you will be responsible for maintaining the highest quality of testing required for cutting edge clinical decision making.

- Perform accurate and timely laboratory testing according to SOPs within the allowable timeframe
- Develop, implement, and maintain SOPs per CLIA regulations
- Demonstrate the ability to use good judgement and independent thinking in data analysis and interpretation of patient results
- Maintain all Quality Management Systems requirements
- Conduct instrument maintenance programs, i.e. preventative maintenance, cleanliness, and maintains records of service in compliance with CLIA
- Review testing issues with the Technical Supervisor to get direction for troubleshooting and next steps
- Ensure that all remedial actions are taken whenever test systems deviate from the laboratory's established performance specification

- Train new personnel with regard to technical and operational procedures
- Provide leadership and direct a team of technologists through positive communication and support
- Ensure all laboratory members are proficient in assay processing, including biannual (first year) and subsequent annual competency training
- Work with the lab team to monitor and maintain supply inventory and place orders
- Support the Lab Director in all governmental and regulatory audits
- Manage and monitor Quality Control (QC), Quality Assurance (QA), Safety and Inspection practices to assure compliance with CLIA regulations

Required Qualifications

- Master's or bachelor's degree in clinical laboratory science, medical technology or chemical, physical, or biological science and 1 year of experience in high-complexity clinical testing laboratory

Preferred Qualifications

- Qualified as a Technical Supervisor for high complexity testing
- Hands on experience performing esoteric testing in molecular biology or genetics
- Knowledge of qPCR

Benefits

- Comprehensive medical coverage, including health and dental
- Additional health optimization opportunity with comprehensive laboratory testing from Function Health™
- Paid time off
- 401(k)
